

# Wool Sorting

1

## Semi-Automated Table Integration

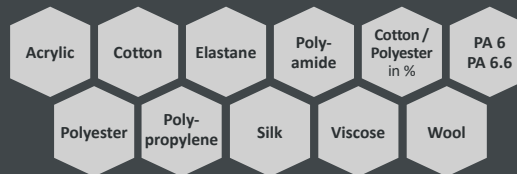

- Handheld device
- Table holder with integrated sensor for automated measurement start
- Easy to install in existing tables

2

## Cloud Services

- Database available globally

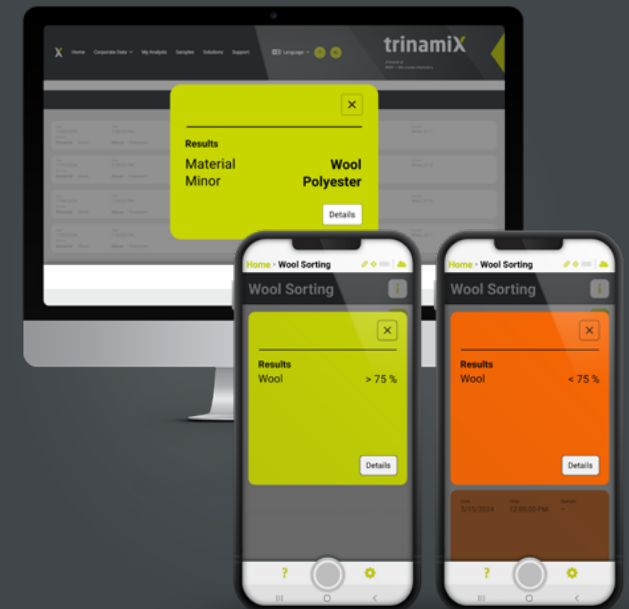

Classification of the wool content in knitted textiles. To speed up material identification in the Wool Sorting application, the measurement interval is shortened to 1.5 seconds.

3

## Desktop / Smartphone App

- Provides actionable results in real-time
- Available for Windows, Android & iOS

A content of 75 % wool or higher is highlighted in green, whereas less than 75 % wool contents are flagged in red.
